Foreword

I have worked with the best, or perhaps it's better to say that I have learned from the best; that's how I can best describe this book, because I spent some time with Svetozar Gligoric in the early 2000s and the Nimzo-Indian was also present. I can't really say that we went into great detail, but we certainly did discuss various systems. This book in particular is about the Rubinstein 4.e3 systems. Some of the material has been analyzed in my earlier book on the QGD and Nimzo, while some other material is presented in Volume 1 in this short series, which covers the Nimzo with 4.♘d2 and 4.♙c2. From other published books I used Gligoric's book on the Nimzo-Indian and Ivan Sokolov's book on the Nimzo with 4.e3. I found both books useful.

I need to give one explanation here and it's about the Tal Variation because that system is treated also in my Volume 1, where I analyze the 4.♘d2 line. In this Volume 2 I have omitted all positions where White places a bishop on d2 early in the game, while Volume 1 deals exclusively with an early bishop to d2 move by White.

I hope readers will enjoy both of those books.

Position after: 5. ♙d3

Here we will investigate rare lines and variations, such as the Taimanov, that are not so critical.

5... d6

We will check some unusual or lesser-known lines in which Black is going either for the ...e5 plan, or for the ...d5 plan but in a less orthodox way.

5... ♖e8 A bit rare but actually a reasonable idea. 6. ♘ge2 It is clear that the knight belongs on this square now; it's more flexible there.

6. ♞ge2

Here too we see that the knight is effective on e2 when Black is going for ...e5 plans.

6... e5

Black is trying a combination of ideas. We will see that choosing the ...e5 plan is possible, but a bit passive.

7. 0-0

(see diagram next column)

7... c6

Black's point is to preserve his bishop by clearing the c7-square for it.

14... Nxe4 15. Qxe4 g6 16. d5 f5 17. Qf3

White's position looks very strong.

1. d4 Nf6 2. c4 e6 3. Nc3 Qb4 4. e3 O-O 5. Qd3 d5 6. Nf3 Nc6

Position after: 6... Nc6

This is the correct move order if Black wants to play the Taimanov system. Sometimes Black plays ...Nc6 on move 4 or 5, but by playing ...d5 first Black is forcing the white knight to go to f3 rather than e2, which enables Black to enter the best version of this system.

7. O-O dxc4

Black can also wait a bit before making this typical move.

8. ♙xc4 ♙d6

The main point of the whole Taimanov system. Black is playing for the ...e5 break.

9. ♙b5 e5 10. ♙xc6 exd4 11. exd4 bxc6 12. ♙g5

Black has the bishop pair, but weak pawns on the queenside.

Here we see an old line that actually has not been popular for a long time, and there is a good reason for that.

8. a3 xc3

8... a5 9. cxd5 exd5 10. b4!

Position after: 10. b4!

This is a key idea that Gligoric found during his match with Tal in Belgrade. But Tal, who used this system with Black, deviated at a critical moment and only later in some other games was

Gligoric able to reveal this great idea, which brought him some nice wins. 10... cxb4 11. b5 a6 12. b3 bxa3 13. d6 c7 14. xa3 xd6 15. xd6 e8 16. fc1 e6 17. f4 h6 18. h3 White enjoys nice play for the sacrificed pawn, 1-0 (50) Gligoric, S – Andersson, U Berlin 1971.

13. c4! cxd4 14. cxd5

Even simpler is 14. xd4! dxc4 15. c1 d6 16. b5 xb5 17. xc4 d8 18. axb5 when White is better.

14... dxe3 15. fxe3 ♖b6 16. ♘d4 ♘df6
17. ♖b1 ♚d8 18. ♚c2

With less clear consequences, 1-0 (30)

Position after: 7... b6

This is another old line but it has recently become popular again, and it's not without point. Black actually wants to play the Karpov line but is waiting in the center, maintaining the tension.

8. cxd5 exd5 9. a3

In my opinion this is a good choice, although in his book on the Nimzo Gligoric stated that 9.dxc5 bxc5 10. ♘e2 is also OK, as he played in one of his games versus Keres.

9... ♘xc3 10. bxc3

Position after: 10. bxc3

10... c4

A) 10... ♘a6 11. dxc5 bxc5 12. ♘xa6
♘xa6 13. c4!

Position after: 13. c4!

That is an important motif. Now Black has a few choices but none gives him equal play. 13... ♖b8 [13... dxc4 14. ♚a4 ♘c7 15. ♘b2 ♘e6 16. ♖fd1 ♚e7 17. ♚xc4 ♖fd8 18. h3 White has some edge here] 14. ♚a4 ♚b6 15. cxd5 ♚b5

21. ♞f5 This position is favorable for White, 1-0 (48) Parligras, M (2622) – Atalik, E (2474) Golden Sands 2012.

B) 10... ♞c6 This position can arise also from the main move order, if instead of going 9... ♚c7 Black plays 9...b6 and here we are. Gligoric mentions in his book that this line originates from Nimzowitsch himself. 11. ♞e5 ♚c7 12. ♞xc6 ♚xc6 13. f3

Position after: 13. f3

Now Black will try to stand still while controlling e4, or else try to exchange the light-squared bishops with ...♙a6. 13... a5 [13... ♙e6 14. ♚e1 ♞d7 15. e4 c4 16. ♙c2 f5 17. e5 ♜f7 18. a4 a5 19. f4 White has better chances, 1-0 (40)
